

Model #120 ABH Adjustable Backboard Height Attachment

The model #120 ABH shall be constructed of 1 7/8" O.D. galvanized sliding pipes which operate through clearance collars and is furnished with supporting angles, bearings and adjustable collars to permit 2'-0" of vertical adjustment of the backboard and goal. Unit shall be designed for attachment to the supporting backstop framework and shall accommodate the type of backboard specified. A removable hand crank with rotating grip handle shall be provided for easy operation from the floor, no ladders required. Unit shall be factory assembled and tested prior to shipment.

Model #120 ABH is available for all types of backboards and on all ceiling hung and wall mounted stationary backstops. Not recommended for use on model 12-WF wall mounted fold-up or model 15-WSF wall mounted side-fold backstop (consult factory for alternatives).

Model #1120 Cordless ABH Winder

Model #1120 ABH winder is equipped with a 14.4 volt, high torque motor. The unit has a low setting of 0-500 RPM, and utilizes an adjustable clutch which develops up to 460 in./lbs. of torque. Direction reversing switch is located above the trigger switch and includes a "lock" position. The model #1120 has sufficient power to raise or lower a #120 ABH equipped with a rectangular glass backboard. Motor and gears are factory lubricated which should be sufficient for 6 months to 1 year depending upon usage. Consult manual provided for additional operating and maintenance instructions.

Model #140 EBH Electric Backboard Height Adjuster

The model #140 EBH shall be constructed of 1 7/8" O.D. galvanized sliding pipes which operate through clearance collars and is furnished with supporting angles. Unit shall be designed for attachment to the supporting backstop framework and shall accommodate the type of backboard specified. Backboard shall be raised or lowered by a linear actuator with built-in limit switches. Motor shall be 1/10 HP, 115 VAC and shall develop 53 in/lb. of torque at 85 RPM. Unit shall be factory assembled and tested prior to shipment.

The model #140 EBH comes standard with a portable operating wand. Optional operating controls available are key switch, "Goal-Tender" wireless remote control system and "Gym Command System" keyless control system.

Model #140 EBH is available for all types of backboards and on all ceiling hung and wall mounted stationary backstops. Not recommended for use on model 12-WF wall mounted fold-up or model 15-WSF wall mounted side-fold backstop (consult factory for alternatives).
