

RECTANGULAR BACKBOARD SPECIFICATIONS

RG-20 Rectangular Glass Backboard

Lifetime warranty

Rectangular 42" x 72 x 1/2" thick tempered plate glass backboard meets all NCAA and high school specifications. Tempered plate glass is set in an extra heavy welded steel frame assembly cushioned with a shock absorbing vinyl molding between the glass and the framework. Mounting brackets are permanently bolted to the frame and punched with lateral adjustment for mounting to a backstop frame. Official border and center target areas are fired into the glass with brilliant vitreous enamel conforming to official regulations. The extra heavy steel goal mounting plates are kept away from the glass by Lexan, a polycarbonate insulating material. This provides superior impact strength over standard steel or aluminum plates. Advanced design construction includes a 1 1/4" tubular steel support brace extending end to end across the lower framing for greater board strength. Both the glass and the mounting plates are drilled for a 5" x 4" goal pattern using plated steel bushings for mounting.

RG-30 Rectangular Glass Backboard

Lifetime warranty

Rectangular 48" x 72 x 1/2" thick tempered plate glass backboard meets all NCAA and high school specifications. Tempered plate glass is set in an extra heavy welded steel frame assembly cushioned with a shock absorbing vinyl molding between the glass and the framework. Mounting brackets are permanently bolted to the frame and punched with lateral adjustment for mounting to a backstop frame. Official border and center target areas are fired into the glass with brilliant vitreous enamel conforming to official regulations. The extra heavy steel goal mounting plates are kept away from the glass by Lexan, a polycarbonate insulating material. This provides superior impact strength over standard steel or aluminum plates. Advanced design construction includes a 1 1/4" tubular steel support brace extending end to end across the lower framing for greater board strength. Both the glass and the mounting plates are drilled for a 5" x 5" goal pattern using plated steel bushings for mounting.

RF-42 Rectangular Fiberglass Backboard

Lifetime warranty

Rectangular 42" x 72" x 1 9/16" thick fiberglass backboard. This backboard is constructed with two pieces of extra heavy-duty gel coated fiberglass panel, epoxied together over a solid 50 lb. density wood core. Backboard shall have 2" wide orange target area and perimeter markings inlaid into the face of the bank during the molding process. Four key-slotted mounting brackets, spaced 20" on-center vertically and 35" on-center horizontally, are secured on the backside. Goal mounting hole pattern 5" x 4" will accept each type of goal.

RF-50 Rectangular Fiberglass Backboard

Lifetime warranty

Rectangular 48" x 72" x 1 9/16" thick fiberglass backboard. This backboard is constructed with two pieces of extra heavy-duty gel coated fiberglass panel, epoxied together over a solid 50 lb. density wood core.
